How Biostim Pellets Work:

- Biologically digests sludge and reduces sediment.
- Reduces excess nutrients and helps lower aquatic weed and algae growth rates.
- Clears water by reducing suspended organic solids.
- 100% Natural.
- Completely fish friendly and aquatic life safe.

Biostim Pellets

Biostim Pellets are used for dealing with sludge and cleaning up the damage from other imbalances in your ecosystem. Focused on the lower layers of your water body, this treatment is highly concentrated.
