

FLOATING FOUNTAIN

High-quality fountain

Matala high-quality fountain can be used in ponds, lakes or retention ponds. It sprays water up to 11.5ft (depends on different fountain head) into the air. The compact design houses a powerful 2,860gph pump that sits low in the water. Simply anchor the fountain and plug it in! Fountain kit includes pump, float and 1-1/2" nozzle (can offer 4 type different option heads. Please contact.)

Optional LED light kit features three 10watts (10Wx3=30W), white spotlights that brightly illuminate the fountain. dual-timer controller automatically turns on/off lights. LED light kit include a control box, a 65.6ft or 130ft power cord, 3 LED lights and 2 T type connectors.

LED OPTIONAL

Features and Benefits

- Low operation cost
- Improves water quality
- Increase oxygen level
